Danielle Fudger

SUMMARY

Certified Project Management Professional (PMP) and Certified Scrum Master with over six years of experience leading digital projects, including Salesforce implementations. Adept at managing cross-functional teams, Agile processes, and client relationships to deliver high-quality technical solutions. Strong software development background with the ability to bridge the gap between business needs and technical execution.

EXPERIENCE

Americaneagle.com — *Technical Project Manager*

MAY 2019 - NOVEMBER 2024

— Managed the scope, schedule, and budget of multiple $1M+, 5,000+ hour projects, ensuring alignment with client objectives.

— Led cross-functional teams in executing complex technical projects, including process automation, multi-system interoperability, website redesigns, student portal overhauls, Sitefinity CMS migrations, and third-party integrations.

— Oversaw projects from discovery through design and implementation, ensuring solutions aligned with business needs and technical feasibility.

— Facilitated Agile Scrum ceremonies (sprint planning, daily stand-ups, retrospectives) to optimize delivery and track sprint progress.

— Tracked project performance using burndown charts, velocity projections, and timeline variance metrics to provide data-driven insights.

— Identified and mitigated risks, proactively resolving technical and delivery challenges to keep projects on track.

— Managed vendor relationships, overseeing third-party integrations, technical dependencies, and seamless system deployments.

— Developed project roadmaps, resource allocation plans, and communication strategies, ensuring cross-team alignment.

— Led business and functional requirements sessions, translating client needs into epics, features, and user stories.

— Drove stakeholder alignment by preparing status reports, project charters, and executive summaries.

Morgan Stanley — *Technical Project Manager / Scrum Master*

MARCH 2018 - MARCH 2019

— Led the development and modernization of Risk Viewer Alpha, a real-time Equity Risk Management platform, upgrading UX from WinForms to WPF.

— Facilitated Agile Scrum ceremonies, aligning sprint goals and schedules with business-critical trading operations.

— Reduced UI lag by 200%, enhancing front-end performance and trader efficiency.

— Engaged daily with Equity Risk trading desks, translating trader needs into technical specifications for developers and leadership.

— Managed BDD workflows in Jira, tracking user issues and development tasks to improve transparency and prioritization.
